Bursa Today
Visual trading compass

10 Apr 2026 , only setups worth human attention

QL Resources
Priority 1
Cleaner setup, already above breakout

Kossan Rubber
Priority 2
Conditional setup, trigger still needed

Executive read

- This is not a broad Bursa hunting day.
- If QL and Kossan do not confirm, do not force a trade.
- For constrained capital, no trade is better than low-quality trade.

Bursa Today Visual Compass

QL Resources (7084) , cleaner candlestick sheet for today

10 Apr 2026

QL Resources , daily candlestick view

Last price

RM3.98

Best trigger

Hold above RM3.95

Risk line

Below RM3.70 invalidates setup

Targets

RM4.20, then RM4.45

Distilled read

- Already broke above RM3.95, so this is the cleaner Bursa setup.
- Valid only if price holds after open, not if it gaps up then fades fast.
- Best used as a watch-first counter, not a blindly chase counter.

Watch first. Only act if price holds above the breakout area after open.

Bursa Today Visual Compass

Kossan Rubber (7153) , cleaner candlestick sheet for today

10 Apr 2026

Kossan Rubber , daily candlestick view

Last price

RM1.19

Best trigger

Reclaim RM1.22

Risk line

Below RM1.13 invalidates setup

Targets

RM1.31, then RM1.40

Distilled read

- Strong day already happened, but this one is more conditional than QL.
- Cleaner trigger appears only if price reclaims and holds above RM1.22.
- Without trigger confirmation, this is still a watchlist name, not a trade.

Only act if it reclaims RM1.22 with follow-through. Otherwise skip and save cash.
